

THE GLOBAL EQUITY FORUM

A signature event for THE EQUITY FORUM NPC, the GEF has the aim of providing a global platform for interaction across a diagonal of interests, positions, and predicaments in order **to redress global inequities in more innovative and inclusive ways.**

It aims to do this by:

- Providing a top-of-the-mind programme that will attract a broad spectrum of high level interest from government policy-makers, global institutions, development agencies, academics, business leaders, community-based organizations, and the general public from around the globe
- Engaging directly with global institutions, development agencies, and regional bodies to migrate existing agenda's, global interventions, and constituencies onto this platform, so that we are truly enabled to make a difference for the benefit of all

THE EQUITY FOUNDATION NPC

An international non-profit organization, The Equity Foundation NPC is dedicated to facilitating, funding, and supporting innovative and inclusive processes, projects, and programmes for redressing global inequities, and enabling a wider integration of equity principles and practices in our society, ensuring a better quality of life, for all.

To do this we primarily engage in:

- **Providing research and support** to a range of public, private, and social sector organizations, thro' collaboration with other global institutions
- **Providing transactional advisory services** to projects and programmes that promote and further the aims of equity
- **Organizing and supporting** global events, symposiums, and festivals to build awareness, craft solutions,, and highlight best practice in equity actualization
- **Sourcing and distributing funding and support** into equity projects and programmes

As an independent foundation, started by South Africans, we hold the example of Nelson Mandela and his dream for a free, equal, and non-discriminatory society very close, and strive thro' our efforts to facilitate this vision on a global scale.
